MANAGEMENT CONSULTING

CMS Migration of Global Corporate Company from Documentum to AEM

PERIOD:	1.5 years.
CLIENT LOCATION:	US & CANADA
DESCRIPTION:	<p>Conexio Provides one of the three distributed development teams that are implementing the migration of this client's website from Documentum to AEM, which contains tens of thousands of webpages in dozens of languages.</p> <p>Our experts have development templates, components, workflows, servlets and reporting services using AEM 5.6 (at the beginning of the project), and 6.0, 6.1 & 6.2 as these versions were released by Adobe.</p> <p>Our Company has also provided a QA team that handles migration testing, and gives feedback and reviews on components developed by the other development teams.</p>
TECHNOLOGIES:	AEM 6.2, 6.1, 6.0 & 5.6, Akamai, Sightly, JSP, ExtJS, JavaScript, JQuery, Bootstrap, Bundles, Git.

DIGITAL AGENCY

POC. Implementation of Landing Pages in AEM

PERIOD:	2 months.
CLIENT LOCATION:	UNITED STATES
DESCRIPTION:	<p>Conexio implemented the migration of the agency´s landing page from plain HTML to AEM 5.6 utilizing slice framework.</p> <p>This project involved the creation of a template and several components as well as content migration.</p>
TECHNOLOGIES:	AEM 5.6, JSP, JavaScript, jQuery, Slice Framework, Bootstrap, Bundles.

AEROSPACE

Migration from AEM 5.6 to 6.0

PERIOD:	3 months.
CLIENT LOCATION:	CANADA
DESCRIPTION:	<p>This project consisted on the migration of the client´s website from AEM 5.6 to 6.0 without modifying or altering its functionality or design. The database was also migrated from JCR 2 to JCR 3.0 (OAK). Since the new version does not support automated index creation, Conexio's Team had to make them.</p>
TECHNOLOGIES:	AEM 5.6, 6.0, CRX2OAK Migration tool, OAK-TarMK.

HIGHER EDUCATION, UNIVERSITY

Performance Tunning & Mobile Site Redesign

PERIOD:	3 months.
CLIENT LOCATION:	CANADA
DESCRIPTION:	<p>This front-end project consisted on redesigning the mobile version of the university's website built on the AEM 5.6, which has tens of thousands of users. The main goal set by the client for this project was to improve the user experience.</p> <p>Since performance is crucial to a good user experience, our Team executed performance tests and worked towards reducing loading time as much as possible.</p> <p>During this project, Conexio's developers worked tightly with the final client's team.</p>
TECHNOLOGIES:	AEM 5.6, JSP, JavaScript, jQuery, Bootstrap, CSS3 & LESS, SVN.

HEALTH CARE PRODUCTS

Component and Workflow Development

DESCRIPTION:	<p>Conexio was selected by Adobe to be an AEM 6.1 Forms Beta Testing Program Contributor.</p> <p>Our team explored and tried the features provided by the module and provided feedback to Adobe's development team.</p>
TECHNOLOGIES:	AEM 6.1 Forms.

DIGITAL AGENCY

POC. Research on AEM apps.

PERIOD:	2 months.
CLIENT LOCATION:	CANADA
DESCRIPTION:	The agency was considering entering the AEM Apps space. Conexio developed a MVP version of an AEM App, using AngularJS, for the agency to demo its clients.
TECHNOLOGIES:	AEM 6.1 Apps, AngularJS, JavaScript, jQuery

ENERGY

QA, Bug Fixing and Responsive Components Development

PERIOD:	6 months.
CLIENT LOCATION:	UNITED STATES
DESCRIPTION:	<p>Conexio performed QA and Load Testing on the AEM solution implemented by another System Integrator, reported bugs, and fixed them. Our team also did performance tuning and optimization on the website.</p> <p>Our front-end developers also developed Components with responsive layouts for the social media integration of the website.</p>
TECHNOLOGIES:	AEM 6.0, Sightly, JavaScript, jQuery, Bundles

NGO, CLASSIFICATION SOCIETY

Templates, Components, and Touch UI Dialogs Development

PERIOD:	6 months.
CLIENT LOCATION:	UNITED STATES
DESCRIPTION:	<p>This project has strong focus on working with innovate front-end technologies introduced by Adobe in the lastest versions of AEM, in addition to some back-end development.</p> <p>Conexio's team is implementing styles and templates for the AEM Forms, Newsletter Mailing and reporting of the application. It also performed research and implementation of an AEM to Act-on connector used for marketing automation.</p> <p>The project also required migrating dialogs of all custom built componenents for Classic UI to Touch UI.</p>
TECHNOLOGIES:	AEM 6.1, JSP, JavaScript, jQuery, Granite, Touch UI, Bundles, Git, Act-on

EDUCATION, MASSIVE OPEN ONLINE COURSES

Migration from WordPress to AEM and Development of Touch UI Dialogs

PERIOD:	9 months.
CLIENT LOCATION:	UNITED STATES
DESCRIPTION:	<p>This project has two components, front-end development and migration to AEM.</p> <p>The front-end work involves improving templates and designs user for the integration with Marketo, Twitter Feed and the Header and Footer of the client's multi-language web application. New styles are being created for a Disqus based blog and its content migrated to the new platform. A custom blog component was needed and created on top of the one provided out-of-the-box with AEM.</p> <p>The CMS of the website was migrated from WordPress to AEM. Touch UI dialogs are being developed to support custom built components.</p>
TECHNOLOGIES:	AEM 6.0, Sightly, Touch UI, JavaScript, jQuery, Granite, Bundles, Git, Disqus
